Davis, John C., 1986, Statistics and data analysis in geology: 2nd ed., John Wiley & Sons, New York , 646p.

Marshak, Stephen and Mitra, Gautam, 1988, Basic methods of structural geology: Prentice Hall, Englewood Cliffs, New Jersey, 446p.

INDEX OF TERMS

"	10-3
(10-3
2d	10-3
8	10-3
F1	9-1
F2	9-1
F3	9-1
M	10-2
MS	10-2, 10-3
Q	10-3
alitude	1-4
angular magnitude	11-3
angular unconformities	11-2
Anticline	5-3
antiform	4-5, 5-3
antiformal syncline	5-3
apparent	11-1
Apparent Thickness	6-1
Apparent Width	6-1
Asymmetric fold	5-3
attitude	1-1
Axial Plane	3-2, 5-1
Axial Trace	3-2
Azimuth	1-2
Basin	5-3
bearing	1-3
Bedding	5-1
best-fit vector	8-1
Beta (&) diagram	4-4
Brunton Compass	1-4
circular sections	9-1
Cleavage	5-1
clinometer	1-4
closed traverse	5-4
Coefficient of Determination	8-7
compositional layering	5-1
confidence region	8-1
Conical	4-4
Conical distribution	8-1
conjugate fractures	9-2
contour interval	7-1

counting node point	4-2
crossbedding	3-2, 5-1
curvilinear	1-1
Cylindrical	4-4
Cylindrical girdle	8-1
degrees of freedom	8-9
Depositional contacts	5-2
dilation	10-1, 11-1
dip	1-2
Dip slip component	11-2
directional cosines	8-1
distortion	11-1
Dome	5-3
Doubly-plunging	5-3
ellipsoid	10-2
Equal-angle	2-1
Equal-area	2-1
Fault Contacts	5-2
Fault Translation	11-1
finite strain ellipse	10-1, 10-2
flexural-slip	4-5
Fold Axis	3-1
Fold Hinge	3-1, 5-1
Fold Limb	3-2
Fold symmetry	5-1
Foliation	5-1
foreset beds	3-2
graded bedding	5-1
great circle	2-1
Great circle girdle	4-4
hanging wall	5-2
homogenous plane strain	10-1
horizontal attitude	7-1
hyperbolic net	10-2
igneous contacts	5-2
Index of Terms	1-1
Interlimb Angle	3-2
Intersection lineation	5-1
isoclinal	4-5
joint sets	5-2
K angle	8-1
Kalsbeek counting net	4-2
L1	5-1

Latitude	1-1
least-squares	8-1
Lineation	5-1
lithostatic stress	9-1, 9-2
Longitude	1-1
lower-hemisphere projection	2-1
magnetic declination	1-5
mean vector	8-1
Megascopic	5-2
Megascopic Fold	5-2
Mesoscopic	5-1
Mineral lineation	5-1
Mohr Circle Diagram	9-1
Mohr fracture	9-1
net slip	11-1
net slip vector	11-1
neutral	5-3
Normal fault	5-2
normal stress	9-1
north pole	2-1
oblique slip	11-2
outcrop prediction	7-1
Outcrop Width	6-1
Overtured fold	5-3
Overtured Limb	3-2
Pace length	5-3
paleocurrent	3-2
Parallel Fold	12-1
parallel folding	8-1
passive-slip	4-5
perpendicular bisector	11-3
Pi (B) diagram	4-4
piercing point	11-1
pitch	1-4
plane table	1-4
Plunge	1-3
pocket transit	1-4
Point cluster	8-1
Point maximum	4-4
pole	2-2, 3-1
primary bedding	3-2
primitive	2-1
Quadrant	1-2

rake	1-4
rake angle	2-3
Random Distribution	4-3
recumbent	4-5
Recumbent fold	5-3
reverse fault	5-2
RF	10-2
rigid-body translation	11-1
ripple mark	5-1
rotation	11-1
rotational axis	3-5, 11-3
rotational component	11-1
rotational fault	3-5
Rotational faults	11-3
RS	10-2
Rule of V	7-1
S0	5-1
S1	5-1
Schmidt	4-1
sense of the rotation	11-3
separation	11-1
shear stress	9-1
shear stress (J)	9-1
similar	12-1
Similar Fold	12-1
Small circle girdle	4-4
small circles	2-1
sole mark	3-4
south pole	2-1
strain marker	10-1
stress ellipsoid.	9-1
stress tensor	9-1
strike	1-1
Strike slip component	11-2
Strike-slip fault	5-2
superposed	5-3
symmetry	4-5
syncline	5-3
synform	4-5, 5-3
synformal anticline	5-3
thrust	5-2
total finite strain ellipse	10-2
traverse legs	5-4

Traverses	5-4
True dip	1-2
true magnetic north	1-4
True Thickness	6-1
Unconformity	5-2
United State Geological Survey	1-5
upright	4-5
Vertical attitude	7-1
Wulff	4-1
z scores	8-9
½ apical angle	8-1
