

Review Questions: Midwest Flood video

1. When and where did this flood occur?
2. What factors contributed to the severity of this flood (how high the water got and how much damage was done)? (include both natural and human factors)
3. Why did the hydrograph of the flood show multiple peaks and drops?
4. What effect did the levees have on the overall height of the water in the river? Explain your answer.
5. What are some things that could be done to lessen the severity and impact of future floods?
