

# GY 402 Sedimentary Petrology

## Lecture 23: Shelves

Two cross-sections, labeled **C** and **D**, showing the profile of the **Well Bank** area.   
**C** shows a cross-section from 285° to 105° with a sea level line. The profile shows a relatively flat shelf top with a distinct slope leading down to the sea level. A scale bar below indicates 0, 1, and 2 km.   
**D** shows a cross-section from 215° to 35° with a sea level line. The profile shows a more gradual slope leading down to the sea level. A scale bar below indicates 0, 1, and 2 km.
